

AHT Inc. Professional Technology **Gap Assessments** for Hotels & Resorts

AHT Inc.'s premium technology gap assessments deliver a macro-level audit of hospitality technology & information systems. Our world class team of hospitality technology professionals integrate cutting-edge knowledge with breakthrough solutions to address the needs of your hospitality business.

AHT Inc. Technology Gap Assessments seek to create sustainable proven value by analyzing strategic areas of hotels & resorts including:

- Hospitality Guest Technology & IT Service Strategy
- Guest Technology & IT Service Design
- Knowledge Management
- Data Management
- Change Management
- Technology Disaster Management
- Vendor Management
- Continual Improvement & Planning

Inspired by the ITIL 4.0 & PCI frameworks, our professional gap assessments analyze hospitality businesses to enact strategic IT service management in accordance with property's needs.

Physical Technology & I.T. Asset Audit

Our professional analysts will perform an elaborate physical walkthrough audit of your property observing all integrated technology systems and I.T. assets.

Network Security & Stability Audit

AHT Inc. technology gap assessors will conduct a comprehensive virtual network test to identify vulnerabilities, competencies, security flaws, compliance issues, and legacy hardware.

Technology Scorecards

Our professional hospitality technology analysts will prepare a detailed report of hotel & resort technology & I.T. assets. The report will establish asset health, compliance, and security status for property owners in a meaningful manner.

Recommendations & Technology Management Strategy

AHT Inc. analysts will provide recommendations and a formal technology & I.T. management strategy for hotel & resort owners.
