

Proliferation of smart phones, mobile devices, technological advancements & cloud based services have played a vital role in increasing productivity in almost every business segment. This has also led to intensify the risks such as technological, commercial/financial, information security, external legal and regulatory compliance risks. Advanced Hospitality Technologies have taken benefit of industry's best modules, policies and devices to mitigate such potential risk and data access vulnerabilities. We assist and help our customers to achieve their industry's applicable law and regulatory compliances and let them focus on running their core business.

Our Risk & Compliance Management is comprised of below service components:

- PCI Compliance Management
- End User Security Awareness Training
- PCI External Smart Scan
- PCI Internal Vulnerability Scan
- Managed Security Firewall
- Guest Network Radius System
- Managed Infrastructure Security
